RE: Amherst Island Wind Project Receptor IDs Clarification

In response to several questions received from Amherst Island residents asking for the receptor number associated with their homes in the Draft Noise Assessment Report and Shadow Flicker Report, Windlectric is providing the following table. For each Receptor ID, the table provides the corresponding property identification number (PIN) and tax roll number. Please note that those receptors with a distance to the nearest turbine location greater than 1,500m will not be included in the draft Noise Assessment Report. The Ministry of Environment noise assessment guidelines require those receptors within 1500m of any turbine to be assessed.

The tax roll numbers are provided for convenience only and are based on the best available data from a third party, however, there may be discrepancies. The Property Identification Numbers are the basis for the receptor identification and to the best of our knowledge and belief are accurate.

Regards,
Algonquin Power Co. (on behalf of Windlectric Inc.)

Sean Fairfield
Senior Manager- Project Planning
