

# AMHERST ISLAND WIND ENERGY PROJECT COMMUNITY LIAISON COMMITTEE

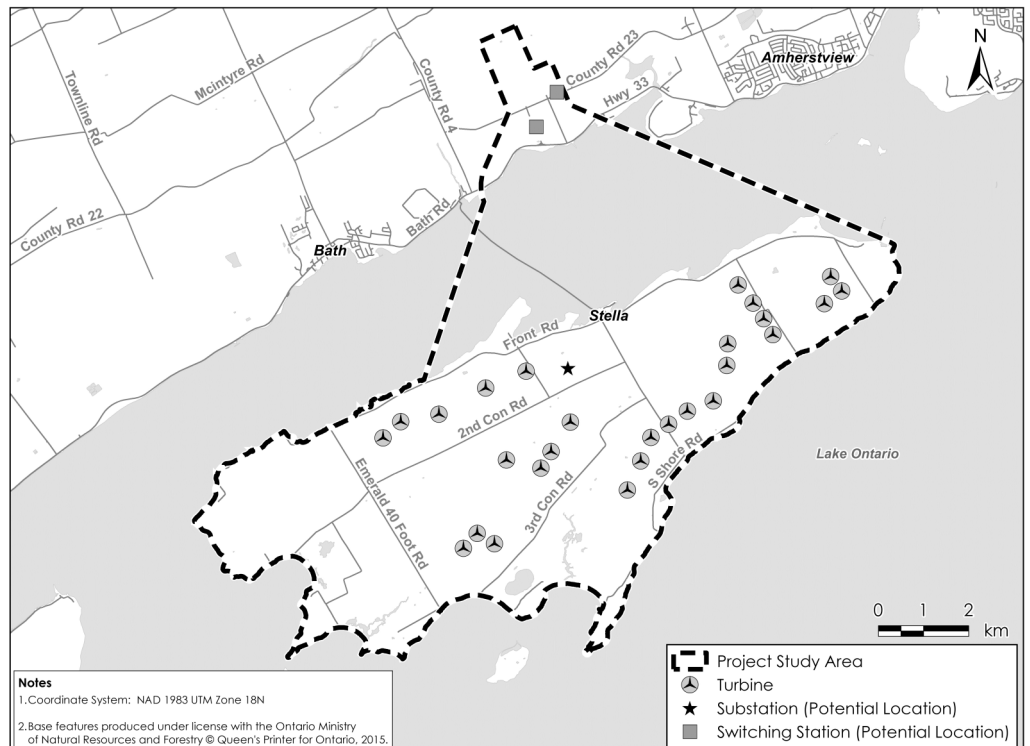

On August 24, 2015, the Ministry of the Environment and Climate Change granted a Renewable Energy Approval (REA) for the Amherst Island Wind Energy Project (the Project), an up to 27 wind turbine, 56-75 megawatt (MW) wind project within Loyalist Township in the County of Lennox and Addington in eastern Ontario.

To satisfy the requirements of the REA, the Project must establish a Community Liaison Committee (CLC), open primarily to residents living within 1 km of the Project, but also to those who have an interest in construction, operation, maintenance, and decommissioning of the Project.

We would like to invite interested members of the community to contact the Project team if you would like to participate in the CLC. The goal of the CLC will be to update the community on Project milestones, activities, issues, issue resolution, and mitigation. The committee and the Project team will also hear concerns and interests of the community, as provided by CLC members. If you are chosen to join the CLC, you will be asked to communicate with friends and neighbours, provide updates, and seek feedback, acting as a voice for both your community and the Project. Meetings will be open to the general public for observation.

If you are interested in becoming a member of the CLC, please provide your contact information and a short description of your interest in the Project by December 3, 2015. The Project team will then contact you directly for further information on the next steps in the process.

The first of at least four meetings to be held over the next two years will allow the CLC and the Project team to discuss the Terms of Reference and functional guidelines for the CLC. Details on the first CLC meeting are to be determined, but will be communicated to committee members when finalized.

For further information, or to request to join the CLC, please visit our website at <http://amherstislandwindproject.com/>, or contact:
