

# NOTICE OF A PROPOSED CHANGE TO A RENEWABLE ENERGY PROJECT

## by Windlectric Inc. regarding a Proposal to Engage in a Renewable Energy Project

**Project Name:** AMHERST ISLAND WIND ENERGY PROJECT

**MOE Reference Number:** 1271-96VNH3

**OPA Reference Number:** FIT-FUT3NOX

**Project Location:** The Project will be located on Amherst Island and a portion of land located on the mainland within Loyalist Township in the County of Lennox and Addington in eastern Ontario.

**Dated at:** On this the 3rd day of July, 2014.

Windlectric Inc. (Windlectric) (a subsidiary of Algonquin Power Co.) is planning to engage in a renewable energy project in respect of which the issuance of a Renewable Energy Approval (REA) is required. The proposal to engage in the project and the project itself are subject to the provisions of the *Environmental Protection Act of Ontario (Act)* Part V.0.1 and Ontario Regulation 359/09 (Regulation) which covers Renewable Energy Approvals. This notice must be distributed in accordance with Section 16.0.1 of the Regulation. This notice is being distributed to make the public aware of a proposed **change to the project**.

### Project Description and Proposed Change:

Pursuant to the Act and Regulation, the facility, in respect of which the project is to be engaged in is considered to be a Class 4 wind facility. If approved, this facility would have a total maximum contract name plate capacity of 56 - 75MW. This project is being proposed in accordance with the requirements of the Act and Regulation and consists of up to 36 Siemens wind turbines. The turbine model proposed utilizes the same 36 turbine pad locations that have been subject to the assessment required under the Renewable Energy Approval (REA). The layout includes 24 Siemens SWT-2.3-113 2300 kW and twelve (12) Siemens SWT-2.3-113 2221 kW model wind turbines. The final layout will result in a total installed nameplate capacity of approximately 56 - 75 MW. The number of wind turbines will be dependent upon final selection of the model of the wind turbine most appropriate to the proposed Project.

An application has been made to the Ministry of the Environment to change the proposed project. The proposed change consists of minor administrative and minor technical modifications to the REA Application including the following: minor revised location for underground cable vaults on project maps; minor change to transmission line route and submarine cable route; minor change to island and mainland dock design; and insert missing figures into Project Description Report. The minor changes are proposed as a result of reviewing design features of the layout. No other changes are proposed to the design of the project or the nameplate capacity. The project location is described in the map.

### Documents for Public Inspection:

Windlectric has developed a Modification Document which summarizes the minor amendments. A written copy of the Modification Document is currently available for public inspection on the project website ([www.amherstislandwindproject.com](http://www.amherstislandwindproject.com)). Copies of the final REA documents also remain available on the project website.

### Project Contacts and Information:
