RE: Amherst Island Wind Project

Dear: Amherst Island Resident

As we move closer to increased construction activity on the island, it is our intent to provide you with the most up-to-date and relevant information on the construction of the Amherst Island Wind Project. The Operations Plan for the Project outlines a communications strategy on how we intend to provide information to the public. The plan can be reviewed by visiting www.amherstislandwindproject.com. The best place to view information at your leisure is through our website. On the site you will find all the relevant information on the project.

On a weekly basis we will be providing you with a map that shows the areas that we intend to be working in. The map will provide a simple visual description of which roads are anticipated to be impacted by Project activity at some point during the upcoming week. The map will identify trenching, aggregate deliveries, concrete deliveries and component deliveries with separate colours. This map will also be available through the project website, the Project Facebook page and Twitter. We have included the first of these maps in this package.

On a daily basis, we will be supplementing our Weekly Construction Map and providing more details on Traffic Interruptions, Single Lane Restrictions, and Road Closures which will be issued via the Project website, the Project Facebook page (<https://www.facebook.com/AmherstIslandWindProjectUpdates/>) and Twitter (@Amherst_WindP) (including tweeting at YGKTraffic). In addition to the social media feeds, the local radio station will also be provided with communication from the site construction management in order to relay it to listeners. In addition, starting September 1, you will be able to call 1-844-379-7740 to get these daily updates on Traffic Interruptions, Single Lane Restrictions and Road Closures.

As always, if you have any questions or comments, we ask you to send an email to windlectric@amherstislandwindproject.com.

Sincerely,

The Windlectric Team
