

CWG #13 – Question & Answer – March 26th, 2018

| | Question | Answer |
|---|---|---|
| 1 | <p>We noticed that ploughing is being carried out at the site of the wind measuring tower on the south end of Stella Forty-Foot, and also on the south side of Second Concession.</p> <p>What is the purpose of the ploughing? Is it to complete archaeology that was not done for the wind measuring tower or is something else planned for the south Stella 40ft site? Is the second site near Second Concession for the Operations and Maintenance Building?</p> | <p>Areas were worked in order to prepare the MET tower and Operations and Maintenance Building areas. As in all activities related to the project, required permitting is in place prior to construction activities, as required, to comply with regulations. Windlectric is committed to abiding with all relevant permits.</p> |
| 2 | <p>What additional archaeological assessment is underway or planned?</p> | <p>Windlectric is following all required protocols and commitments as previously discussed with the MTCS. Any such details require follow up with MTCS as per regulations – please visit http://www.mtc.gov.on.ca/en/archaeology/archaeology.shtml for contact information.</p> |
| 3 | <p>What methods are currently being used to reduce dust accumulation?</p> | <p>Water trucks are being used to reduce fugitive dust. As conditions merit, the frequency of trucks is increased.</p> |
